### TROUBLESHOOTING

- Remove cartridge and reattach lightly.
- Over-Usage Protection - battery will shut-off after 10 seconds of continuous activation and LED will flash twice.
- Low Battery Indication - LED will flash 10X.

### CAUTION

- Battery is **NOT** waterproof.
- **DO NOT** expose battery to direct sunlight.
- **DO NOT** expose battery to freezing temperatures.
- **DO NOT** tamper with battery.

## VAPING TIPS

Start low and go slow. Everyone has a different tolerance level, and it may take a few tries to find the perfect amount for you.

Take 1 or 2 draws from your vape and wait 20-30 minutes. It may take time to notice the full effects of your product.

Use responsibly. Never operate a motor vehicle while impaired.
